As another classification on photovoltaic tiles----curved tiles, T MAX S has attracted countless people's attention with its beautiful shape. Undoubtedly, its Bent barrel design most closely matches the shingle in people's mind, and can ...

Solar roof tiles (or photovoltaic roof tiles) are a way to seamlessly integrate solar technology into your home without compromising the natural design of your home. It works on the same principle as traditional solar panels. Therefore, solar roof tiles combine the functionality and aesthetics of BIPV, allowing for uniformity of design!

The product comes in three models: curved, flat and upturned C styles. During the launch event in Beijing, an all-in-one construction team was able to build a 50-sq-m (538.2 sq ft) rooftop using 168 pieces of the new solar tiles for about 40 minutes, according to the press release. That installation has a capacity of 5 kW.
