

Portable power storage power station

What is a portable power station?

These little ones are generally smaller than a lunch box and good for tasks like recharging laptops and speakers, LED lighting, and small fans. On the high-capacity end, portable power stations top out at around 4,000 Wh plus are expandable with extra batteries.

What devices can a portable power station run?

So long as your portable power station has the right ports and enough capacity, it can run a massive range of devices, including phones, laptops, and desktops. Higher capacity units will also let you power appliances and charge electric vehicles. Check which ports your preferred model has, including USB Type-A and Type-C, AC and mains sockets.

How much power can a portable power station hold?

While a particular power station might claim to hold 1,000 watt hours, the actual amount of usable power you can get out of it is a different story. The best portable power stations also have an onboard computer that shows you how much energy is left in your unit, as well as how much power it's currently using.

What are the best portable power stations?

To help you decide, I tested the efficiency, in a variety of scenarios, of the best portable power stations from Jackery, Oupes, EcoFlow, Anker, Goal Zero, Greccell, Bluetti, Dakota Lithium, Lion Energy, Vtoman, and Ugreen. [What to Know Before Purchasing a Portable Power Station](#)

What are the main features of a portable power station?

Most portable power stations have main common features (such as a battery and ports to pull power from that battery). However, port options, battery sizes, UPS ability, and recharging ability are some features that could vary from product to product.

Why should I buy a portable power station?

A portable power station offers more than just recharging your devices. It can power lamps to light a room, or in some cases keep a fridge running during a power outage. It's not just a really big portable battery pack.
