

Solar irrigation system in Manchester UK

How does a solar irrigation system work?

The Solar Irrigation System has an ingenious solar pump, which automatically regulates the amount of water it pumps i.e. it pumps the most water when the sun beats down, which is exactly when your plants need it. Install an Irrigatia Solar Irrigation System and it will never forget to water, so it is a great way of watering while you are on holiday.

Are solar-powered irrigation systems a good idea?

Solar-powered irrigation systems allow you to automatically water plants that are a long way from a tap as they are connected to a water butt or tank, but they have some drawbacks. The timer with integral pump must be higher than the water butt or tank to draw the water and must be in a sunny spot to charge, which can make placing them tricky.

Does the solar irrigation system include a rechargeable battery?

Our price INCLUDES the rechargeable battery unlike many of our competitors. The Solar Irrigation System has an ingenious solar pump, which automatically regulates the amount of water it pumps i.e. it pumps the most water when the sun beats down, which is exactly when your plants need it.

How does a solar watering system work?

It's a solar watering system that needs no mains power : 100% off grid. The powerful pump means you don't need a tap or garden hose, so it can run anywhere you have a water tank. If you have a tap, just leave out the pump. It's smart, and saves water. It won't water when the soil is moist, and can water extra when you plants need more.

Which irrigation system is best for a large garden?

The SOL-C60 irrigation system is the perfect automatic watering solution for those with large garden...
