String Holiday Light Party Light Garden Lights ...

The brightness of solar lights is measured in lumens. The output of a bright solar light is about 200 to 400 lumens, while a small pathway light may only emit 10 to 15 lumens. If you're looking to light up an area of your yard so that you can sit outside or entertain at night, we recommend outdoor solar lights that emit at least 200 lumens.

Please note: External light sources, such as other garden lights or street lighting, can sometimes throw a spanner in the works. Due to the artificial lighting, the sensor simply perceives the surroundings as too bright to switch on the solar light. In addition to the twilight sensor, many of the solar lights still have an on and off switch ...
