

## 90v inverter to 24v

What does a 24V battery inverter do?

A 24V battery inverter is a device that converts 24V battery output (DC, or direct current) into 230V mains output required for domestic appliances (AC, or alternating current). It can also function as a backup/emergency power source in case of power cuts.

How much power does a 24V inverter consume?

A good sized 24V inverter could use about as much power just being on as your lights do. If the lights consume 45 watts and run for 12 hours a day, the total power usage would be 45 watts x 12 hours = 540 watts. The battery power required for losses plus the load could double that. The lights themselves may be DC, using a small transformer (wall wart) to go from 120Vac to (likely) 12Vdc.

Where can I find a 24V inverter?

Here at RoadKing.co.uk, you can find a full range of 24v Inverters for trucks, lorries, boats, and other 24v vehicles that are ideal for travel and leisure applications.

What are the ideal applications for 24v inverters?

Our 24v Inverters are ideal for travel and leisure applications. Here at RoadKing.co.uk we stock a full range of 24v Inverters for trucks, lorries, boats and other 24v vehicles.
