Who makes the best off-grid inverter?

One of North America's leading manufacturers of off-grid power systems is Outback Power. Founded in 2001 by three power systems design engineers, they specialize in split-phase inverters.

Which inverter should I choose?

Inverter Bis the ideal choice for those seeking a balance between efficiency and affordability. With an efficiency rating of 90% and a reliable power output, it offers a cost-effective solution for small to medium off-grid systems.

Are camping inverters worth it?

The wild is calling...GET OUTSIDE! Camping Inverters can make your trip more comfortable and keep you connected for emergencies. From solar to signal fires, here is our review of the best camping inverters available today.

What size inverter do I Need?

The size of the inverter you need depends on your off-grid setup. For a small off-grid cabin without AC, we recommend 1kW to 3.5kW. For an off-grid house with a single AC unit, 5kW will do a great job. To power a large off-grid house with all the regular appliances and an AC, you'll need around 10kW of power.

We awarded the Marsrock 1000W inverter our "Best All-Rounder" thanks to its relatively agreeable price point combined with a high AC output wattage. Attractively designed, perhaps the most enticing feature of the Marsrock range is the LCD screen on the front, which provides the customer a live-tracking of the input and output voltages, MPPT ...
