Outdoor mobile power supply is an outdoor multifunctional power supply based on lithium-ion battery, which can output USB, USB-C, DC, AC, car cigarette lighter and other commonly used power interfaces.

They can maintain power when a power supply is disconnected so no data is lost in electronic devices such as laptops and mobile phones. Coupling - capacitors block DC signals and allow AC signals to pass through, and as such they can be used to couple one section of a circuit with another. Often used in loudspeaker applications.
