

CtEK with outdoor power supply

Do I need a CTEK battery charger?

Most CTEK battery chargers 12V and 24V are AC/DC; they plug into a standard power grid socket. If you don't have a grid power source near your vehicle, you will need an autonomous battery charger like our CS FREE that allows you to recharge your battery anywhere.

How do CTEK battery chargers work?

CTEK battery chargers 12V and 24V (depending on the model) start charging batteries with charge levels as low as 2-3 Volts. Some CTEK battery chargers have a special function called "SUPPLY", which allows them to charge completely depleted batteries, an impossible task for standard battery chargers that can save your battery.

Are CTEK battery chargers spark free?

CTEK battery chargers 12V and 24V are spark free; still, it is always best to be careful. Besides, connecting the battery charger to the battery's negative pole may affect and sometimes damage systems such as the BMS (Battery Management System) and other electronic modules.

Can a CTEK battery charger charge a 12V or 24v battery?

CTEK battery chargers 12V or 24V use state-of-the-art electronics to charge different types of batteries safely. Before buying a battery charger, you should know what power output you need; for example, cars and small utility vehicles usually work with 12V lead-acid batteries, and heavy-duty vehicles with 24V lead-acid batteries.

Can You unplug CTEK clamps?

But with CTEK, you can unplug the clamps in any order you want. If there were no issues with your battery or your vehicle's electrical system, you would be able to start your engine without a hassle. In some cases, your battery won't hold a charge; unfortunately, there's nothing a 12V or 24V battery charger can do about it.

What is a CTEK pro120 battery charger?

The CTEK PRO120 is an innovative and highly efficient 120A battery charger that's designed to meet the demands of the diagnostic workshop. View product sheet (EU version) The 8 step charger that's ideal for smaller 24V batteries and maintenance charging for fleets with 24V vehicles.
