Can a containerised generator power a construction site?

At Dale, we have a wide range of containerised generator units that can power everything from a construction site to a hospital and even large scale events. Dale's containerised generator units are able to offer bespoke designed solutions to meet your specific site requirements.

What is a containerised generator?

Containerised generators offer increased levels of weather protection for the generator unit in harsh environments. For example they're ideal for exposed locations, marine environment, oil and gas applications. As they're enclosed in a secure container that is usually a clean environment they often require less maintenance.

How many kVA can a container house a generator?

These containers house generators ranging from 800kVA to 3000kVA, available in 20ft, 40ft, and 45ft sizes, tailored to fit your specific needs. Contact us today to discuss your requirements. In addition to our standard range, we offer custom-manufactured containers tailored to your specific needs.

Why should you choose a containerised generator?

Power Management: Synchronisation capabilities for multi-generator setups. Our containerised generators provide critical power backup for MOD, HS2, HMP sites, as well as for sectors like construction and agriculture. These sets are particularly suited for M&E contractors, offering reliable and efficient power solutions for demanding applications.

Are containerized generators reliable?

Years of use in the rental, oil and gas, mining and other heavy-duty industries have tested the reliability, usability and durability of our containerized generators. Our primary design challenges in developing this line of containerized generators were usability, reliability and functionality for the end user.
