What is a MCC enclosure?

Our MCC enclosures or modular custom cabinets are intentionally configured to maximize space utilization, create an orderly equipment arrangement in the control room, and increase operational efficiency. Additionally, we design them for easy installation and maintenance and to accommodate accessories of any type and size.

What is a KDM MCC enclosure?

The KDM MCC enclosure (or motor control cabinet) houses motor control centers (MCC) and associated electrical components in industries, factories, or other relevant commercial facilities. They protect critical electrical infrastructure, including electrical accessories, wiring, and electric motors.

What is a KDM MCC cabinet?

This KDM MCC cabinet (also called MCC switchgear enclosure) includes an assembly of electric motors with custom-sealed IP67 switchgear. Its features include a central power bus and compartments with motor starters, fuses, or circuit breakers. This cabinet is available in custom NEMA 4 corrosion-resistant alloy steel and aluminum.

What is a KDM MCC panel box?

Also known as the KDM MCC panel box, this enclosure is fabricated in various NEMA-4 corrosion-resistant aluminum and steel materials. We provide the best sealings for their doors to prevent hard dust and water ingress. You can order them in custom designs, colors, sizes, dimensions, and overall specifications.

Why should you choose a steel MCC enclosure?

Steel is cost-effective, easy to maintain, and can withstand harsh weather conditions. Coating: To prolong the life and radiance of our custom MCC enclosures, we use powder coating to give them a polished look. Which is why your MCC enclosure can remain glaring even after many janitorial servicing.
