What is MPPT solar inverter?

Nowadays, almost all solar inverters are embedded with MPPT technology. An MPPT solar inverter performs two roles: The maximum power point tracker in the inverter converts high DC power into low DC power. The low DC power is converted into AC power that's used to run your household appliances.

What is a 6kW hybrid solar inverter?

Wide PV input range (Up to 500Vdc), support no battery working during the day. SAKO hybrid Inverter 6KW has a built-in WIFI function so that you can check the operation status of the 6kw hybrid solar inverter through APP at any time. Suitable for residential use, such as apartments, villas, etc.

Do string inverters need MPPT technology?

MPPT technology is a necessity for all on-grid string inverters these days. Without one, a string inverter will not be able to perform well. Although MPPT has drawbacks, they're also the most economical option. Only MPPT in string inverters can ensure that a solar array is generating maximum power.
