

What is the current power system of Mozambique?

The power system of Mozambique is separated into two transmission networks isolated from one another: the Central-Northern and Southern systems. Over 50% of the annual power demand is seen in the Southern system. The optimal power system expansion plan if wind and solar capacity are allowed to triple to reach almost 3 GW by 2032.

What is Mozambique's main energy source?

Coal: Coal-fired power plants contribute a smaller share, around 1-2%, of the total electricity generation mix. However, coal is more significant as an export commodity for Mozambique.

What is the optimal power system expansion plan for Mozambique?

The optimal power system expansion plan for Mozambique involves tripling its wind and solar capacity to reach almost 3 GW by 2032. This plan considers the current separation of the power system into two isolated transmission networks: the Central-Northern and Southern systems, with over 50% of the annual power demand in the Southern system.

What is the current electricity access rate in Mozambique?

Despite having 38.6% of its population with access to electricity in 2021, Mozambique has the largest power generation potential in the entire Southern African region thanks to its vast and largely untapped gas, hydro, wind and solar resources.

How much electricity does Mozambique have in 2021?

In 2021, Mozambique had around 2,800 MW of total installed power capacity. Despite this, only 38.6% of its population had access to electricity. The peak demand reported by the state-owned energy utility Electricidade de Moçambique (EDM) was at 1,035 MW.

Why is Mozambique focusing on hydropower?

Mozambique is focusing on hydropower due to its high hydro power potential. The country is developing large hydropower projects that aim to be operational at the beginning of the 2030s. Hydropower projects play an important role in decarbonizing the power sector in Mozambique.

The Programme Objectives are: (i) to increase stability of the Mozambican power system, (ii) enable a large expansion of power sales to Southern Africa Power Pool (SAPP), ...
