

Nas check the uninterruptible power supply

Does QNAP NAS support an uninterruptible power supply (UPS)?

QNAP NAS provides an External Device function to support using an Uninterruptible Power Supply (UPS). A UPS can be connected by USB, SNMP, or as a Network slave. By configuring the Power Recovery and UPS settings in the Control Panel, you can add safeguards to mitigate the effects of unexpected power outages. Open the Control Panel.

Does a NAS need a UPS?

A NAS is very prone to power fluctuations and interruptions. To protect against data loss, corruption, lost RAID configuration, and hardware damage, a UPS (Uninterrupted Power Supply) is recommended. A UPS device provides uninterrupted and clean power to connected devices.

What is the first step to enable UPS support in the NAS?

After the hardware installation of power cords and USB data cable, power up the NAS and log in to DSM as administrator. Go to Control Panel > Hardware & Power > UPS tab. First, enable UPS support in the NAS. Without allowing this and selecting the proper UPS type, there is no communication between UPS and NAS via the USB cable.

How do I connect a NAS to another NAS via UPS?

If another NAS is connected to another UPS, that NAS is the primary NAS for that UPS. After the hardware installation of power cords and USB data cable, power up the NAS and log in to DSM as administrator. Go to Control Panel > Hardware & Power > UPS tab. First, enable UPS support in the NAS.

Should I use an uninterruptible power supply (UPS) with a USB connection?

One of the advantages of having an uninterruptible power supply (UPS) with a USB connection is that it is possible to smartly shut down any computers during a power outage. My strategy is when the UPS goes on battery, I want the Windows PC and Linux server to shut down immediately (well after a 1 minute timeout).

What is the UPS type for a secondary NAS?

At each secondary NAS, go to Control Panel > Hardware & Power > UPS tab, and to: By selecting Synology UPS Server as the UPS type, this NAS connects to the network UPS Server on the primary NAS.

Test UPS Communication: Check the communication between your NAS and any connected Uninterruptible Power Supply (UPS) to ensure that your NAS can safely shut down during power interruptions.
