

Outdoor power supply 280w

In theory, if it's a high quality 280W power supply, AND allows all 280W on the 12V rail, then it could work, but it's really pushing the limit, and is NOT advisable. The shop should have put a more capable power supply in that machine. Thanks, I'll take the pc to the shop . Upvote 0 Downvote. A. alexnitro2005. Jul 10, 2018 ...

This is a replacement power supply/recharger for an HP Omen laptop that requires 280W @ 20 VDC, 14A. Just like the original, it's pretty powerful and isn't a lightweight PS, but it does the job exactly the way it's intended. I measured 20.6 VDC output, which is right in the sweet spot of the requirements.

Input: 110-260V AC 47/63HZ, Output: 24V DC 23.3A 280W. Converts 110V AC to 24V DC, widely use for LED strip lights, led light bulbs and other 24V DC led lights(<=280W). 100% Waterproof IP67 protect for outdoor use.
