Complete features, technical documentation and all the information you need. We want to make your work easier and more efficient.

Who is water disinfection Soler & Palau?

.. . - Water Disinfection Soler & Palau - world leaders and specialists in the design, development and manufacture of ventilating fans and air moving appliances for HVAC Domestic, Commercial, Industrial, Agricultural and Specialist OEM applications.

What are the different types of low pressure centrifugal fans?

The range comprises different versions and sizes of double and single inlet fans. All these low pressure centrifugal fans are designed for belt drive operation. All the fans are manufactured from galvanised sheet steel and fitted with impeller manufactured from galvanized sheet steel.

SMXD-HT series is a direct drive mixed flow fan specially designed to maximize the airflow performance by acting as a hybrid between an axial and centrifugal fan. This HT (high temperature) model can provide emergency heat and smoke ventilation in the event of a fire, which can provide valuable time to people exiting or emergency personnel. ...

All motors within PV fans are fully speed controllable using voltage or frequency control regulators. The PV series of duct exhaust or supply fans have been specifically designed for simple installation and many years of maintenance free operation. These fans can be mounted at any angle and at any point along the duct.

LPD and LPD-SF direct drive fans are designed to exhaust air in low CFM (up to 420), with high static pressure capability up to 1-3/4". When aesthetics are a concern, the low profile design of the LPD is the perfect choice. The LPD is generally used for bathroom, office or light commercial ventilation in ducted systems; and can be mounted ...
