LPO can finance projects across technologies and the energy storage value chain that meet eligibility and programmatic requirements. Projects may include, but are not limited to: Manufacturing: Projects that manufacture energy storage systems for a variety of residential, commercial, and utility scale clean energy storage end uses.

A joint venture between Northvolt and Volvo Cars. Our mission is simple: develop and produce the world's greenest battery -- ready to propel us into a more sustainable future.

Energy Storage Sizing Optimization for Large-Scale PV Power Plant . The optimal configuration of energy storage capacity is an important issue for large scale solar systems. a strategy for optimal allocation of energy storage is proposed in this paper. First various scenarios and their value of energy storage in PV applications are discussed.

Launched in April 2021 the project entails the construction of a 4 storey main building with the shape of a palaver tree, under which ancient generations of West African communities hosted public gatherings and made communal decisions.
