Do you need an uninterruptible power supply (UPS)?

If you have important electronics that have to keep running when the power's out, you'll need an uninterruptible power supply (UPS). We've reviewed our recommendations and are confident these are still the best UPS devices you can buy. Many smart devices have built-in battery packs, with modern laptops packing enough cells to last a whole day.

Does an ups have a battery & a power supply?

In most cases, an UPS incorporates a battery, a surge protector and a power supply in one unit, but most uninterruptible power supplies also have additional filters (RFI/EMI noise filtering and Automatic Voltage Regulation or AVR) that protect your equipment in case of brownouts, without relying on the battery power.

What is a ups & how does it work?

What is a UPS? UPS stands for uninterruptible power supply, it's a device that acts as a battery backup in case of an electrical power failure. Small UPS machines for homes and offices supply enough power for a few minutes, so there's time to turn off devices properly without losing any work.
