Purchase 12v inverter 48v inverter

Normally, 48V inverters are more efficient than 24V inverters, and 24V inverters are more efficient than 12V inverters. Before you make a purchase, please consult with PowMr customer service to ensure that the inverter you are purchasing is the right size for your system to determine the voltage and power that is best for you.

Divide the wattage you want to run (plus conversion/inverter overhead of say 20%) by 12v. $2000w + 400w = 2400w$. $2400w / 12 = 200amps$. You would need to supply somewhere around 200amps (not exactly, because you would probably be supplying closer to 13.8-14v to your 12v inverter..) of 12v dc power to your 12v inverter.

While the choice between 12V and 24V inverters is common, there is also a 48V option available. A 48V inverter is even more efficient than 24V inverters because it operates at an even higher input voltage. However, ...
