Are electric vehicle batteries coming to Latvia?

Swedish tech company Anodox Energy Systems has announced plans to produce electric vehicle batteries in Latvia, with the first factory in the Port of Riga expected to be operational by December 2022. A second factory for rapidly growing LFP cell technology will be established soon after.

Will a new battery factory be built in Latvia?

The Swedish company Anodox Energy Systems wants to build two factories in Latvia to produce batteries for electric vehicles. According to Latvia's Ministry of Economy, a plant for the assembly of battery packs will be built first in the port of Riga. The second plant, which will focus on cell production, is to follow shortly afterwards.

How much money will Anodox invest in Riga?

A total of 50 million euros will be invested and up to 300 new jobs created, according to the Ministry of Economy. The factory in Riga is to go into operation by December 2022. In the first phase, Anodox wants to produce high-quality battery packs for electric cars and light commercial vehicles in the automated factory.

How much will Riga invest in LFP cell technology?

A second factory for rapidly growing LFP cell technology will be established soon after. A total of EUR50 million will be invested and up to 300 new jobs will be created. This announcement aligns with Riga's effort to establish Latvia as a European hub in the global automotive value chain.

Why did Anodox Energy Systems open a factory in Riga?

"We are very glad that Anodox Energy Systems decided to open factories in Riga. This will bring investment, jobs, and income to the city as well as assess the attractiveness of opportunities that our city offers by ensuring that Riga is competitive in attracting new high-growth companies.

What is the demand for lithium-ion batteries in 2024?

That is more than 2.5 times annual demand for lithium-ion batteries in 2024, according to BNEF. While demand across all sectors saw year-on-year growth, the EV market - the biggest demand driver for batteries - grew more slowly than in recent years.

The electric vehicle (EV) industry has received a major boost with the steepest decline in lithium-ion battery pack prices in seven years, as reported by BloombergNEF's annual battery price survey. The average price of battery packs fell 20% in 2024 to \$115 per kilowatt-hour (kWh), a significant step toward achieving price parity between ...

Online reviews were good. I also had a local friend in China check them out, no concerns raised. They had the
