

# Russia s St Petersburg energy storage project for new energy

Will Russian energy storage firm Reener invest in EV batteries?

June 23,2023: Russian energy storage firm Reener says a special investment contract providing incentives and financial backing for domestic production of batteries for EVs and stationary storage systems was signed at the St Petersburg International Economic Forum on June 16.

Should Russian energy transition be 'gradual' and 'balanced'?

The rhetoric of the Russian establishment occasionally acknowledges the necessity of energy transition,albeit with the condition that it should be "gradual" and "balanced," as Putin said at the BRICS summit in Johannesburg in August.

Is Russia a'fundamentally new stage' in technological development?

Calling it "a fundamentally new stage" in Russia's technological development,the government envisions a reliance predominantly on domestic research and production to meet the country's technological needs.

Will Russia produce a prototype battery by the middle of the year?

The move follows Russia's claim last month that it will have produced prototype batteries by the middle of the year.

Why is the green transition gaining momentum in Russia?

Lanshin agreed that the green transition was gaining momentum in Russia mostly to please its European partners. The real value of some projects,such as achieving carbon neutrality in the Sakhalin region by 2025,remains controversial because the country's climate undertakings are mostly an imitation of a real climate policy.
