Installing a UPS (uninterrupted power supply) system can be a substantial project but can bring with it many benefits including taking control of your power. In addition to protecting against power surges, a UPS can also help you avoid voltage drops or frequency distortion and provided extended runtime in the event of prolonged power loss.

UPS is short for "uninterruptible power supply," and that's exactly what it is. In many cases, a UPS translates to some form of battery backup, but regardless of the technology used, a UPS delivers backup power when your normal power source fails, or when the voltage falls below an unacceptable threshold.
