

Senegal new outdoor power supply price

When will West African energy open a gas power station in Senegal?

West African Energy, a Senegalese energy company, plans to open Senegal's first and largest 300 MW combined cycle gas power station in January 2024.

What is the energy mix in Senegal?

In 2013, the Republic of Senegal adopted the strategic energy plan, which aimed to increase the energy mix dynamic in the country for a five years (2013-2018). The energy mix refers to the development of power generation from coal, gas, hydro, solar and wind. Current percentages of power generation:

How much energy does Senegal use?

Total energy consumption is growing rapidly (+5%/year, on average since 2013, including +16% in 2023) and reached 6.2 Mtoe in 2023, almost 2.6 times its 2000 level. The Yakaar-Teranga natural gas field, located offshore Senegal, is developed by Kosmos Energy (90%).

Who owns Senegal's power?

Senelec owns 15%, while West African Energy controls the remaining 85%. The project, located near Dakar, will use indigenous gas, potentially reducing Senegal's power rates. Turbines are supplied by General Electric, while engineering and construction are handled by Calik Enerji. Sendou - 125 MW

Why is Senegal implementing a gas to power program?

As mentioned above, Senegal is implementing a gas to power program in the energy sector. The purpose of the program is to convert existing thermal power plants to dual-fuel and to build future thermal power plants using natural gas as a primary energy source.

What is Senegal's 125 MW coal-fired power station?

Senegal's Sendou coal-fired power station, with a capacity of 125 MW, has surpassed heavy fuel oil generators as the country's most cost-effective source of baseload power. The project, which has been ongoing since 2007, is a regional success. It intends to enhance Senegal's power dependability and cost through a "Build, Own, and Operate" model.

In a partnership with France, Germany, the EU, the UK, and Canada, Senegal will be supported with EUR2.5 billion in a 3-5-year period to achieve its energy transition ambitions. ...
