

Seychelles outdoor power supply modification

Is a 100% renewable Seychelles power supply possible?

The study 'A 100% Renewable Seychelles' (Hohmeyer,2016) indicates that a power supply solely from renewable sources is technically feasible. With regards to the three islands,Mahé as the main island enjoys the service of a reliable electricity system,which services practically every citizen and has very few downtimes.

Will PV affect the small power system in Seychelles?

If Photovoltaic (PV) systems grow on the power system in Seychelles,issues such as the impact on system frequency due to PV output fluctuations are expected. There are concerns that it may prevent Seychelles from achieving its ultimate renewable energy goal of "15% renewable energy deployment rate by 2030.

What is the energy policy of the Republic of Seychelles?

The Energy Policy of the Republic of Seychelles,established in 2010,aims to convert the country to 100% renewable energy in the long term. Its immediate goals are to raise the renewable energy (RE) penetration rate to 5% in 2020 and to 15% in 2030. The Energy Act was enacted in 2012 based on the same policy.

What is the main power supply in the Republic of Seychelles?

The main power supply in the Republic of Seychelles is diesel power generation,which is dependent on imports for almost all of its primary energy.

What does the Seychelles government do?

The Seychelles Government is committed to providing adequate,reliable and affordable energyto meet future energy consumption needs and to underpin strong economic growth through consumable energy initiatives. The Seychelles enjoy favourable conditions for renewable energy (RE) resources,such as wind and solar.

What is the Seychelles energy plan?

It targets an ambitious transformation and diversification of the Seychelles' currently 85 MW diesel-dominated electricity generation capacity (on Mahé, Praslin and La Digue), aiming at replacing diesel generators with domestic and international public and private financing.

STORY Power Generation Greener power supply in the Seychelles . Posted on February 20, 2024 by Lucie Maluck, Kerstin Hansmann, Images by Rolls-Royce Power Systems. Seychelles aims to generate 15 per cent of its electricity from renewable sources by 2030. Three mtu EnergyPacks QL compensate for power fluctuations and thus stabilise the grid.
