

What is a static uninterruptible power supply (UPS)?

A broad range of static uninterruptible power supply (UPS) is offered by ADC, ranged from floor standing UPS to rack mounted modular hot swappable N+1 UPS. The Power Concept UPS systems fulfill the highest quality of IEC standard, and emphasizes on the high level of power availability.

How many products of uninterruptible power supply (UPS) are there?

There are 1 product of Uninterruptible Power Supply (UPS). DC-DC type small UPS mounts on a DIN rail to provide an ideal countermeasure for momentary power losses and power failures in industrial computers (IPC) and controllers.

What are the different types of power concept UPS?

Different categories of Power Concept UPS are available for different applications such as PC, network server, data centre, industrial and other facilities. The dynamic/rotary UPS systems, using a kinetic energy accumulator, are widely recognised as an advanced reliable solution for the power protection of critical loads and applications.

What is a power concept UPS system?

The Power Concept UPS systems fulfill the highest quality of IEC standard, and emphasizes on the high level of power availability. Different categories of Power Concept UPS are available for different applications such as PC, network server, data centre, industrial and other facilities.

What is the capacity of the MT series ups?

Capacity covers from 40KW to 600KW for easy configuration and investments. User can parallel up to maximum 4 racks/cabinet to reach 2400KW. You may refer to the brochure below to find out more on the features and specifications of our MT Series UPS.

How does a ups work in a power outage?

In the event of a power outage or other electrical issue, the UPS switches to its battery power to supply electricity to the connected devices, preventing them from shutting down abruptly. An uninterruptible power supply (UPS) is a device that provides emergency power to a load when the primary power source fails.
