Does the United Arab Emirates have solar panels?

The United Arab Emirates, being covered by desert, has abundant sunlight. Solar panels are indeed used in the UAE, but not all sunlight that falls on the photovoltaic cells is converted to electricity. The efficiency of solar panels is the percentage of energy from sunlight that is converted to electricity.

How can solar PV units be custom designed?

Be it an On-shore or Off-shore application, solar PV units can be custom designed as per demand. Specially designed shatter-proof solar PV modules with inverters & battery placed inside an explosion proof enclosure can be designed to power the lighting load required on an On-shore or Off-shore oil rigs.

What is a solar security system?

Solar security systems include standalone solar lighting & solar security units, with a Self-contained Solar Power Unit, Motion Sensors and Remote 3g Cellular remote monitoring. The security camera and wireless device are solar powered and video is accessed wirelessly.
