

Vah lithium battery pack

How do you calculate Vah for a 12V battery?

Usually, VAh is calculated for the battery. VAh is a battery parameter. Here, overall battery pack voltage = 72 V (the entire battery pack, which, according to your question comprises six 12V batteries). Since the batteries are in series, remains the same = 7 Ah (Ah is similar to current (A) in series configuration). Hence VAh = 72 x 7 = 504 VAh
