

# Western Europe Watch talks about EK outdoor power supply

What is the EU ecodesign regulation for external power supplies?

The ecodesign regulation for external power supplies is part of a comprehensive package adopted by the European Commission last year. The package, consisting of 10 ecodesign and 6 energy labelling regulations, is expected to deliver a total of 167 TWh of final energy savings per year by 2030.

Can external power supplies be tested under Regulation (EU)2019/1782?

Products containing external power supplies (e.g. USB sockets) which would need to be extracted from the main product and rewired for testing, cannot be tested under Regulation (EU)2019/1782, as there are no standards or methodologies describing such operation. In such situation the Regulation cannot be enforced.

Is there an energy labelling regulation for external power supplies?

No, there is no Energy Labelling regulation for External Power Supplies. Does the Ecodesign regulation for External Power Supplies require the 'Common Charger' for certain products?

Does the Ecodesign regulation for external power supplies require the 'common charger'?

Does the Ecodesign regulation for External Power Supplies require the 'Common Charger' for certain products? The 'Common Charger' is a universal interoperable (USB) power supply which is for the time being required only under the Radio Equipment Directive to be used with mobile equipment like smartphones, tablets or laptops.

How will the new energy rules affect European consumers?

As a result, European consumers will be able to save on their household bills, help reach significant EU-wide energy savings and reduce emissions. The new rules will make the external power supplies more efficient, aligning them to the highest standards worldwide.

What are external power supplies?

External power supplies are power adaptors used to convert electricity from household power mains into lower voltages, and are very common in European households, with an average of ten per household and more than 2 billion in total in the EU.

In our new long term outlook for the Nordic power markets, the latest development of our Europe Power Service, we used our EPSI Europe platform to model supply-demand ...

The market size for outdoor power equipment was USD 25.9 billion in 2021, and it is projected to grow at a CAGR of 6 percent during the forecast period. ... Growth, Trends, and Forecast 2023-2030 - By Product, Technology, Grade, Application, End-user, Region: (North America, Europe, Asia Pacific, Latin America and Middle East and Africa ...
